Market

April 2017 Upate (Issued May 25, 2017)

Highlights

Inflation:

SoSh (Somali shilling)-using areas: Consumer Price Index (CPI) generally exhibits relative stability in SoSh using areas in April 2017 month-on-month. The CPI rose (19-31%) annually due to increases in red sorghum prices.

SISh (Somaliland shilling)-using areas: The CPI increased (12-17%) both month-on-month and year-on-year due to increases in the price of red sorghum.

SoSh-using areas: The exchange rates between SoSh and the United States Dollar (USD) remained relatively stable or changed at mild rates (less than +/- 6%) against USD in most regions of the country. Annual comparison mostly exhibited mixed patterns; specifically, mild (less than 10%) changes were recorded in most of the southern regions; moderate to high (10-40%) depreciations were recorded in central and northeast regions due to printing of local

SISh-using areas: The SISh depreciated (6-17%) against the USD in April 2017 both month-onmonth and year-on-year due to increased supply as a result of printing of local currency notes.

Local cereal prices increased at mild to high rates in most regions of the country in April 2017 with the highest increase (57%) being recorded in Awdal region. The price increases is attributable to reduced supply as a result of two consecutive poor production seasons (Gu 2016 and Deyr 2016). Annual comparison also indicates higher prices for local grains in all regions of the country with the highest increase being recorded in Bay (137%) due to poor production in 2016.

Prices of imported food (rice, sugar, vegetable oil, wheat flour) mostly exhibited relative stability or mild monthly changes (+/-10%) in local currency terms in April 2017 in most regions of the country. Year-on-year comparison indicates mild to moderate price increases in most regions of the country for most of the food imports in April 2017 due to depreciation of local currency against USD and increased global sugar prices.

Livestock prices exhibited mixed patterns; with mild to moderate increases in goat and camel prices recorded in most parts of the country due to reduced supply of saleable livestock. Exceptions are Hiran, Juba, Northwest (Awdal & Woqooyi Galbeed) and Lower Shabelle regions where cattle prices declined month-on-month in April 2017 due to further deterioration of livestock body conditions. Compared to a year ago, livestock prices for all species were significantly lower across the regions of the country due to deteriorated livestock body conditions. Milk prices (camel and cattle) generally exhibited monthly increases in most regions of the country due to low supply. Milk prices also increased at moderate to high rates compared to a year ago in most regions of the country.

Labor (unskilled) wages changed mildly (by less than 10%) month-on-month in most regions of the country in April 2017. Annual comparison indicates declines of labour wages in most regions +/- with the highest decline (55%) being noted in Banadir (Bakara market). The decline is attributed to increased competition for available labour in urban areas as a result of increased in-migration from

Terms of Trade (ToT) between daily labor wage and local cereals either remained stable or declined (by 1-2kg of cereals/daily labor wage) in most parts of the country in April 2017 due to increase in cereal prices and/or decrease in labor wages. ToT between local quality goat and cereals exhibited mixed monthly patterns. ToT increased substantially (52Kgs/goat) in Banadir due to increase in goat prices (61%), the ToT declined moderately (27-39Kgs/goat) in Shabelle and Awdal regions due to increase in cereal prices and/or decrease in goat prices; while in other regions the ToT between goat and cereals changed at mild rates. Annual comparison indicates the ToTs are lower across most regions of the country due to declines in labor wage rates and goat prices and/or increase in local grain prices compared to a year ago (April 2016).

fsnau.org/ids. drought affected rural areas.

This Market Update is a monthly report that presents analysis of market information and is produced regularly as part of the monthly monitoring process.

The weekly price data is collected from 48 main markets and 51 rural markets throughout Somalia

Market analysis is an integral part of all of FSNAU's annual food security projections and seasonal technical reports (Technical Reports on FSNAU Post Gu and Post Deyr Analysis).

Detailed market data are available online on www.

Towns Affected by Trade Disruption (Bulo Burto, Wajid, Hudur and Diinsor)

Labor (unskilled) wages increased in April 2017 in markets affected by trade disruptions as a result of insurgent activities. Annual comparison indicates declines in all the markets

Terms of Trade (ToTs) between daily labor wage and local cereals and between local quality goat and cereals either remained relatively stable or changed at mild rates in all the markets in April 2017. Annual comparison indicates lower ToTs in all markets due to increase in cereal prices and decrease in labor wage rates and goat prices.

Local grain (red and white sorghum) prices increased (14-25%) in Bulo-Burto and Hudur but declined (8-13%) in Wajid and Dinsor in April 2017 due to increased humanitarian intervention (in-kind distribution). On the other hand, compared to a year ago, local grain prices increased substantially in all markets.

Prices of imported food items (rice, sugar, vegetable oil, wheat flour) either remained relatively stable or changed at mild rates for most of the food imports in all the siege affected markets in April 2017. Annual comparison indicates higher prices for most of the food imports in the markets except in Dinsor where prices of most of the food imports recorded declines (10-28%) due to increased supply as a result of relative improvement in security condition.

Table 1: ToT betwen Daily Labour Wage Rate and Cereals by Region April 2017

		kg change from
