FEWS NET

August 2014 (Issued September 19, 2014)

Highlights

Inflation: The Consumer Price Index (CPI) changed marginally month-on-month in August 2014 across the country. It increased by one percent in Northeast and Central zones but decreased by one percent in Northwest and the South. Inflation rose year-on-year in most parts of the country. The rise was most significant in southern zone (by 24%) followed by Central and Northwest zones (by 7% each). Compared to the base period (March 2007), the CPI increased significantly in Somaliland shilling (SISh) areas (28%) as well as in Somali shilling (SOSh) areas (112-133%).

Exchange rate: The exchange rates between local currencies (SoSh and SISh) and the United States Dollar (USD) remained stable in August 2014 in the South, but changed marginally month-on-month in North (1%) and Central (-1%). Compared to a year ago (August 2013), the rates remained stable in the North but depreciated marginally (2-3%) in South-Central. Compared to the five-year average (August 2009-2013), the SoSh shows a strong gain in value. Conversely, the SISh depreciated marginally in the same period of comparison.

Local grain: Following the *Gu* harvest, prices decreased at mild rates in August in most markets with the exception of Bay and Middle Shabelle regions where the prices decreased moderately (by 12-13%). The prices increased marginally in Northeast and parts of the South (Lower Juba and Gedo) and remained stable in Mogadishu's main Bakara market. Annual comparison indicates increase in cereal prices across the country, with particularly high increases noted in southern regions. The highest annual price increase (by 107%) was recorded in the Bay region. Compared to five-year average levels, local grain prices were relatively stable in August in the Central, Northern SoSh, Gedo, Bay and Juba regions, while they rose at moderate to high levels in most of the remaining regions of the country. Most significant increase was recorded in Bakool (by 46%), which was excarbated by continued trade disruptions in the region.

Prices of imported food (rice, sugar, vegetable oil & wheat flour) as quoted in local currency exhibited mild monthly changes (less than 10%) in the month of August in most regions with the exception of Banadir where moderate decline (14%) was recorded for wheat flour price. Year-on-year comparison generally indicated mixed trend patterns across the country. Specifically, prices were relatively stable or changed at mild rates in Northwest, Hiran, Central, Juba, Banadir, Gedo and Shabelle regions for most food imports; they declined moderately (10-11%) in Northeast regions and increased moderately in Bay. Compared to the five-year average, the prices are lower for most food imports across the country.

Livestock prices (for all species) showed mild monthly changes in most regions in the month of August. Milk prices (cattle and camel) showed mixed trend patterns across the country. Specifically, milk prices remained relatively stable or changed at mild rates across the country, except in Bay region where milk prices increased moderately. Annual comparisons indicate declines in values of livestock (local quality goat) in Central and parts of Northwest and the Sorghum Belt but remained stable or increased at mild rates in other regions. Milk prices rose at moderate to significant rates; the highest increase (by 109%) was recorded in Bakool region (for camel milk). Compared to five-year average levels of August, livestock prices showed moderate to high (21%-79%) increases, particularly for the big ruminants (cattle and camel); milk price trends showed mixed patterns across the country.

This Market Data Update is a monthly report that presents analysis of market information and is produced regularly as part of the monthly monitoring process.

The weekly price data is collected from 48 main markets and 51 rural markets throughout Somalia since 1995.

Market analysis is an integral part of all of FSNAU's annual food security projections and seasonal technical reports (Technical Reports on FSNAU Post *Gu* and Post *Deyr* Analysis).

Detailed market data are available online on www.fsnau.org/ids.

Labor wages (unskilled) remained relatively stable in Juba, Central and Northern regions, but declined moderately in Bay, Banadir, Gedo and Shabelle regions in August. Conversely, labour wage rates increased significantly (by 45%) in Bakool, which is driven by increased activities as a result of recently improved security situation. Labor wages showed annual declines for the month of August in most regions, except in Bay, Hiran and the Northern regions where increases were observed. The labor wage rates were higher than their five-year average levels across all regions, except Central and Juba regions which dropped at mild to moderate rates (5-16%).

Terms of Trade (ToT) between daily labor wage and local cereals as well as between local quality goat and cereals have mostly exhibited increases in the month of August with the exception of Central and Northern regions where ToT rates have remained relatively stable month-on-month. Annual comparisons indicated lower ToT in most regions, except in Northern and Central regions, which showed moderate increase (13-14%) and relative stability, respectively. Compared to the five-year average levels, both of the ToTs declined in most of the southern regions, but increased significantly (above 25%) in Northern and Central regions as a result of increased daily labour wages and livestock prices compared to their corresponding five-year averages.

National Trends: CPI, Exchange Rates, Cereal Prices and Relative Purchasing Power

Table 1: ToT between Cereals (kg) per Daily Labour Wage Rate, by Region
