Market DataUpdate

December 2013/January 2014 (Issued February 26, 2014)

Highlights

Inflation: The January 2014 Consumer Price Index (CPI) was unchanged in all zones from the December 2013 level. The minimum cost of living showed minimal monthly or annual variations except for a slight increase in the Central region. The CPI increased moderately in Somaliland Shilling (SISh) regions and significantly in Somali Shilling (SoSh) areas when compared to the base period (March 2007).

Exchange rate: The SoSh gained value while the SISh exchanged nearly at the same rate with the United States Dollar (USD) in the last two months. Compared to a year ago (January 2013), the SoSh strengthened significantly while the SISh depreciated. The appreciation of the SoSh is attributable to high dollar inflows through humanitarian assistance, foreign direct investments and remittances.

Local grain prices have declined slightly over the past two months in most markets as a result of increased market supply following the *Deyr* 2013 harvests. The exceptions are Lower Shabelle and Juba regions where maize prices increased rapidly at the beginning of the year 2014 due to below normal *Deyr* cereal production. Cereal prices remained well above their levels a year ago (January 2013) across many regions.

Prices of imported food (rice, sugar, vegetable oil & wheat flour) quoted in local currency were mostly depressed or stable in the last

two months. The January 2014 retail cost of imported food showed annual declines nearly everywhere because of the appreciation of the local currency against the USD, increased port supplies and a general decline of prices in the international markets.

Labour wage trends were mixed; declining in most markets while slightly increasing or remaining stable in others in the last two months. The decline in labour wages is in line with seasonal reduction in agricultural labour opportunities after the end of harvests in cropping zones. In areas where wage rates increased, this was on account of the general economic recovery, which has seen increased activities particularly in trade, building and construction sectors.

Terms of Trade (ToT) between labour wages and local cereals (monthly trend) were mixed; declined in parts of Bay, Lower Shabelle and Juba but increased elsewhere in January 2014. The decline in ToT was mainly due to increased maize prices and reduced labour wages. The annual comparison (January 2013) shows declines in ToT in many regions apart from increases in Northwest, Gedo, Bakool and Mogadishu.

This Market Data Update is a monthly report that presents analysis of market information and is produced regularly as part of the monthly monitoring process.

The weekly price data is collected from 48 main markets and 51 rural markets throughout Somalia since 1995.

Market analysis is an integral part of all of FSNAU's annual food security projections and seasonal technical reports (Technical Reports on FSNAU Post *Gu* and *Deyr* Analysis).

Detailed market data are available online on www.fsnau.org/ids.

Regional Market Highlights

Juba Regions: Prices of imported food (rice, sugar and vegetable oil) remained stable, cattle declined in most markets while the cost of maize increased in Lower Shabelle but declined in Middle Shabelle in the last two months. January 2014, ToT (11 kg/daily wage rate) sustained December 2013 levels. Compared to a year ago (January 2013), prices are lower for most monitored items. Annual comparisons of ToT between labour and cereals indicate a significant decline in purchasing power of casual labourers.

Sorghum Belt Regions (Bay, Bakool, Gedo and Hiran): Monthly prices of imported food, goats and sorghum decreased in most markets of the Sorghum Belt regions over the last two months. The ToT between labor wage and cereals decreased in Bay, remained stable in Hiran and Bakool but increased in Gedo. Year-on- year price comparisons indicated decline in prices of imports and livestock and increased price of sorghum. In January 2014, ToT declined on an annual basis in Hiran and Bay but increased elsewhere.

Shabelle Regions: Monthly prices of imports and livestock were stable while maize prices increased in Lower Shabelle but declined in Middle Shabelle over the last two months. In January 2014, ToT (labour wage to cereals) declined by one unit in Lower Shabelle but increased by 3 kg in Middle Shabelle when compared to December 2013 levels. Compared to a year ago (January 2013), the prices of most commodities declined except for maize and cattle, which increased. The ToT between labour wage and cereals declined when compared to the same month last year (January 2013).

Table 1: ToT between Cereals (kg) per Daily Labour Wage Rate, by Region

Regions	January 2014*	% change	from:
	2014"	Dec 2013	Jan 2014
Banadir/ Mogadishu	27	0%	17%
Bay	19	-10%	-21%
Bakool	7	0%	17%
Gedo	17	21%	6%
Hiran	14	0%	-33%
Juba	11	-21%	-8%
Shabelle	11	0%	-15%
Northeast	7	17%	0%
Northwest	13	8%	8%
Central	7	17%	-12%

^{*} Cereal types used for ToT calculation: White Maize (Banadir, Hiran, Juba, Shabelle), Red Sorghum (Bay, Bakool, Gedo, Central, Northeast) and White Sorghum (Northwest)

Central Regions: Prices of imported food, red sorghum and goats remained relatively stable over the last two months. Annual comparisons indicate decreases in prices of almost all items except sorghum, with a higher price. January 2014 ToT between local goat and rice (55 kg/goat) was a unit higher than in December 2013 but at the same level of January 2013.

Northeast Regions: General price stability or decline prevailed in most markets over the previous month. Prices of food imports are lower compared to the previous year while goat and sorghum prices increased slightly. ToT between local goat and rice increased by one unit from the previous month to 87 kg/local goat. The ToT is higher (by 9 kgs) than it was in the year 2013.

Northwest Regions: Prices of most commodities remained stable or declined slightly in the first month of 2014 as well as in the last month of 2013. Compared to the previous year, cereal prices increased, goat values plummeted while imported commodities remained generally unchanged except for a slight decline in wheat flour and sugar prices. The ToT between cereals (white sorghum) and labor wage is at 13 kg/ daily labour rate, one unit above December 2013 and January 2013.

Banadir Region: Prices of most commodities remained relatively stable over the last two months in the main Bakaara market. Compared to the year 2013, prices of most commodities are lower apart from goat and maize, which are higher. The January 2014 ToT between labour wage and white maize is unchanged from the previous month's level (27 kgs/daily labor rate) but is higher than the same period last year (January 2013).

International Market Highlights

Diesel: the International crude oil price¹ for January 2014 weakened to \$104.01/barrel, four percent lower than in December 2013. This was considered a turning point after having risen by \$2 between November 2013 and December 2013. The upcoming seasonal refinery maintenance is set to put downward pressure on markets². Crude oil prices are lower by a similar margin when compared to the same month last year (January 2013).

Diesel prices in local currency terms in the port cities of Mogadishu and Bossaso did not change much over the last two months. The retail cost of diesel remained stable in Bossaso but declined slightly in Mogadishu on an annual basis [from January 2013] (Figure 1).

Rice: The export price of the benchmark Thai rice (Grade A1 Super 1/B) eased further (11%) in January 2014, dropping from 347 USD/ tonne in December 2013 to 309 USD/ tonne, on account of weak import demand amid generally ample availability³. The current price is a reflection of declining trends that were witnessed in most of the year 2013. Rice prices remained significantly depressed (45%) compared to the same month last year (January 2013).

The price of imported rice has not changed in both Mogadishu and Bossaso markets since November 2013. The January 2014 price did not show any annual changes (Figure 2).

Wheat: World wheat export prices decreased due to increase in global supplies. The International Grain Council's wheat sub-Index continued to follow a downward trend, falling by three percent in January 2014, to its lowest level in around three and a half years⁴. The Index is about 15 percent lower than it was a year ago [January 2013] (Figure 3).

In Mogadishu and Bossaso, wheat flour prices have not changed since October 2013 but they were 2-7 percent lower than a year ago [January 2013] (Figure 4).

Sugar: The FAO Sugar Price Index⁵ averaged 221.6 points in January 2014, down 13.2 points, or 5.6 percent, from December 2013. This decline represents the third consecutive monthly fall in sugar prices, driven by large export surpluses on the back of bumper crops in the leading sugar producing countries.

Sugar prices have not changed much since November 2013 in both cities (Mogadishu and Bossaso). However, sugar prices were lower (18-25%) in January 2014 when compared to the same month last year. These price trends are attributable to the strengthened SoSh, enhanced port supplies and continued humanitarian interventions (Figure 5).

Cooking Oil: The FAO Vegetable Oil Price Index⁶ averaged 188.6 points in January 2014, down 7.4 points (or 3.8 percent) from December 2013. The current index is the culmination of three months' consecutive declines that started in November 2013. The drop mainly reflects developments in the palm oil market, where large supplies and slow export demand led to concerns over growing inventories, thus driving down prices. Furthermore, large export availabilities of sunflower and rape seed and the prospect of record soybean supplies in South America weakened the prices for other vegetable oils, also weighing on the index.

Monthly vegetable oil price did not change in the two port cities of Mogadishu and Bossaso

Figure 4: Wheat Prices: Mogadishu and Bossaso Markets

Figure 5: Sugar Prices: International, Mogadishu and Bossaso Markets

over the past three months, but reduced on an annual basis (compared to January 2013) by 2 and 7 percent respectively. The latter trend is as a result of accelerated movement of supplies through ports.
