Market DataUpdate

September Data 2015 (Issued October 26, 2015)

Highlights

Inflation:

SoSh (Somali shilling)-using areas: In the month of September, the Consumer Price Index (CPI) changed marginally (1%) in the SoSh-using areas. Compared to a year ago (September 2014), the CPI decreased (5-13%) in SoSh-using areas in September due to cereal price declines.

SISh (Somaliland shilling)-using areas: The CPI remained stable month-on-month in September. The CPI decreased compared to a year ago (September 2014) by 8 percent due to decline in cereal prices.

Exchange rate:

SoSh-using areas: The exchange rates between SoSh and the United States Dollar (USD) indicated stability or marginal monthly changes (1%) in September. The SoSh depreciated compared to a year ago across all areas, most significantly (12%) in Lower Juba.

SISh-using areas: The SISh remained stable against the USD in September month-on-month. Annual comparison indicates depreciation in SISh by 10 percent.

Local grain prices remained relatively stable or changed (increased/decreased) by less than 10 percent in September in Most regions of the country. Cereal prices are lower compared to a year ago in most regions of the country due to Gu 2015 and offseason harvests.

Prices of imported food (rice, sugar, vegetable oil, wheat flour) mostly exhibited relative stability or mild monthly changes in local currency terms in September across the country. Annual price comparison indicated generally stability trend or mild decreases in prices for most of the food imports in September with exception of Bakool region where prices of all food imports declined moderately (13-40%) due to increased humanitarian distribution as a result of improved security situation in the region.

Livestock prices (for all species) remained relatively stable or changed at mild rates (less than 10%) monthon-month in September in most regions of the country. The exception is Bay region where both cattle and local goat prices increased moderately (18-41%) due to improved body conditions as a result of Hagaa rains received and increased demand during the month's Islamic festival. Milk prices (camel and cattle) increased from mild to moderate levels month-on-month in most regions of the country due to increased demand for eid-ul-adha (Islamic festival). Annual comparison exhibited mixed trend patterns; specifically, in the Northern parts of country, yearly prices changed at mild rates (less than 10%); Camel prices of Central and most Southern regions increased while Cattle and goat prices recorded mild changes with exception of Lower Juba and Middle Shabelle where prices declined moderately (18-32%) due to increased supply. Compared to a year ago milk prices (camel and cattle) were higher in most regions of the country.

Labor (unskilled) wages remained relatively stable or increased from mild to moderate in the month of September in most parts of the country. This increase is attributable to increase in labour opportunities in

offseason (Hagaa) harvest and land preparation for the coming Deyr season. Annual comparison indicates mild to moderate increases in wage rates in most regions of the country in September with the highest increase (25%) being recorded in Middle Juba.

Terms of Trade (ToT) between daily labor wage and local cereals either remained stable or increased by 1-3kg/daily labour wage month-on-month in September in most parts of the country; the highest increase was recorded in Banadir region (3kg/daily labour wage) due to decline in cereal prices and increase in labour wages. The ToT between local quality goat and cereals were higher for most of the regions of the country apart from Middle Shabelle, Gedo and Northwest where they mildly declined (1-7%) due to increase in local cereal prices and/or decrease in goat prices. Annual comparison indicated relative stability or increase in ToT between daily labor wage and local cereals in most regions of the country, while ToT between local quality goat and cereals changed at mild to moderate rates across the country with the highest change (increase of 41Kg/local quality goat) being recorded in Bakool due to significant increase in local quality goat prices and decrease in local cereal prices.

Towns Affected by Trade Disruption (Bulo Burto, Wajid and Hudur)

Labor (unskilled) wages remained stable in Hudur but increased by 4 and 10 percent in Bulo Burto and Wajid respectively in September month-on-month. Annual comparison indicated a moderate increase in wage rates in Hudur (16%) due to increase in economic activities as a result of relatively improved security conditions in the region.

Terms of Trade (ToTs) between daily labor wage and local cereals and between Local quality goat and local cereals remained relatively stable month-on-month in Bulo Burto and Hudur while in Wajid the ToT between local quality goat and local cereals increased significantly by 54kg/local quality goat due to increase in local quality goat prices and decline in local cereal prices. ToTs are higher compared to a year ago in Hudur due to decrease in cereal prices and increase in labor wages and goat prices

Local grains prices changed (increased) month-on-month in September in Bulo-Burto (3%) and Hudur (10%) while in Wajid, they declined moderately (25%) due to increase in cereal supply in the market. Annual comparison indicated significant (42%) decline in red sorghum prices in Hudur due to increased humanitarian food distribution and improved access to markets.

Prices of imported food items (rice, sugar, vegetable oil, wheat flour) declined (6-15%) month-on-month in September in all the three markets due to humanitarian food distributions. Annual comparison also indicated decline in prices in Hudur due to improved access as a result of improved security situation.

This Market Data Update is a monthly report that presents analysis of market information and is produced regularly as part of the monthly monitoring process.

The weekly price data is collected from 48 main markets and 51 rural markets throughout Somalia since 1995.

Market analysis is an integral part of all of FSNAU's annual food security projections and seasonal technical reports (Technical Reports on FSNAU Post Gu and Post Deyr Analysis).

Detailed market data are available online on www.fsnau.org/ids.
