Market Update

November 2016 Upate (Issued December 20 2016)

Highlights

Inflation:

SoSh (Somali shilling)-using areas: Consumer Price Index (CPI) increased (2-11%) in SoSh using areas month-on-month with the highest increase recorded in Central (11%); the increases are due to increase in red sorghum prices. CPI rose annually from (9-24%) due to increase in red sorghum prices.

SISh (Somaliland shilling)-using areas: The CPI remained relatively stable month-on-month but increased year-on-year (3%) due to increase in cereal (red sorghum) and imported items prices in the past 12 months.

Exchange rate:

SoSh-using areas: The exchange rates between SoSh and the United States Dollar (USD) indicated relative stability or marginal monthly changes (1-2%) in most regions. The SoSh shows annual depreciation across SoSh-using areas.

SISh-using areas: The SISh indicated stability against the USD in November 2016 compared to previous month and 12 months ago.

Local grain prices either remained relatively stable or increased month-on-month across the regions of the country. Annual comparison indicates higher prices for local grains in most regions of the country in November 2016 with the highest increase being recorded in Bakool (53%) attributable to reduced supply due to insecurity and poor Gu 2016 production.

Prices of imported food (rice, sugar, vegetable oil, wheat flour) mostly exhibited relative stability or mild (less than 10%) monthly changes (increases/decreases) in local currency terms. Year-on-year comparison indicates mild to moderate price increases in most regions of the country for most of the food imports.

Livestock prices either changed at mild rates (less than +/- 10%) or declined in most regions of the country month-on-month due to below average pasture and water availability which has deteriorated livestock body conditions. Milk prices (camel and cattle) generally exhibited monthly increases in most regions of the country. Compared to a year ago, livestock prices were lower across the regions of the country in November attributable to deteriorated livestock body conditions and seasonal reduction in demand. On the other hand, milk prices (camel and cattle) increased annually in most regions of the country in November; exceptions are Middle Juba and Shabelle where camel milk prices declined (14-22%) annually attributable to relatively better milk supply and availability in the markets.

Labor (unskilled) wages either remained relatively stable or changed mildly (by less than +/- 10%) month-on-month across the regions of country. Annual comparison exhibited mixed trend patterns; specifically, rates either remained relatively stable or changed mildly (by less than +/- 10%) in Northern and Central regions; the rates declined moderately (11-22%) in the Southern regions month-on-month as a result of reduced agricultural activities due to poor performing Deyr 2016 rains

This Market Update is a monthly report that presents analysis of market information and is produced regularly as part of the monthly monitoring process.

The weekly price data is collected from 48 main markets and 51 rural markets throughout Somalia since 1995.

Market analysis is an integral part of all of FSNAU's annual food security projections and seasonal technical reports (Technical Reports on FSNAU Post *Gu* and Post *Deyr* Analysis).

Detailed market data are available online on www. fsnau.org/ids.

Terms of Trade (ToT) between daily labor wage and local cereals either remained stable month-on-month or declined (by 1-4kg of cereals/daily labor wage) in most parts of the country with highest decline (4kg of cereal/daily labor wage) being recorded in Bay. The monthly declines in ToT between daily labor wage and local cereals can be attributed to increase in cereal prices and/or decrease in labor wage rates. Similarly, ToT between local quality goat and cereals declined in most regions of the country month-on-month. Annual comparison indicates that ToTs are lower across most regions of the country due to declines in labor wages rates and goat prices and/or increase in local grain prices.

Towns Affected by Trade Disruption (Bulo Burto, Wajid, Hudur and Diinsor)

Labor (unskilled) wages remained stable in Bulo-Burte but declined (4-21%) in the remaining markets month-on-month. Annual comparison indicates declines in all the markets except in Dinsor where daily labor wage rate remained stable.

Terms of Trade (ToTs) between daily labor wage and local cereals and between local quality goat and cereals declined both month-on-month and year-on-year in November in all the markets due to increase in cereal prices and decrease in labor wage rates and goat prices.

Local grain (red and white sorghum) prices increased in all the markets month-on-month. Similarly, compared to a year ago, local grain prices in all the markets increased from moderate to high levels.

Prices of imported food items (rice, sugar, vegetable oil, wheat flour) have changed at mild rates in these markets except in Dinsor where prices declined (16-24%). Annual comparison indicates higher prices for most of the food imports in all the markets.

National Trends: CPI, Exchange Rates, Cereal Prices and Relative Purchasing Power
