

### **Highlights**

**Inflation:** Somali Shilling (SOS)-using areas: Consumer Price Index (CPI) slightly increased (2%) in September 2021 compared to August in northeast and southern regions but increased mildly (4%) in central regions. Compared to the five-year average for September (2016-2020), CPI increased (16-33%) across all regions of Somalia due to higher prices of sorghum (the main local cereal used in the consumption basket) and increases in imported food prices this year.

Somaliland Shilling (SLS)-using areas: CPI remained stable in northwest regions in September 2021 compared to August 2021. However, CPI increased (7%) in northwest regions compared to the five year average for September (2016-2020).

**Exchange rate:** SOS-using areas: Exchange rates between SOS and the United States Dollar (USD) remained relatively stable in most regions of Somalia in September 2021 compared to August. Compared to the five-year average, SOS depreciated at moderate rates (6-12%) in central and southern regions of the country in September 2021. However, SOS depreciated significantly against the USD in northeast region (38%) due to continued circulation of large amount of locally printed SOS currency notes in these markets in recent years.

SISh-using areas: the exchange rate between SLS and USD was stable in September 2021 but appreciated slightly (-4%) compared to five-year average (2016-2020) for September.

Local cereal (white maize, red sorghum and white sorghum prices): Local cereal prices mostly exhibited mild changes ( $\leq \pm 7\%$ ) in most regions of the country in September 2021 compared to the previous month. Specifically, white maize prices remained stable in Banadir and Juba Valley and (0-1%) but decreased mildly in Shabelle (12%). Red sorghum prices increased in September in northeast (4%) and Sorghum Belt (4%) while

white sorghum prices increased in Hiran (2%) and northwest (7%). These increases can be attributed to reduced market supply because of low carryover stock from recent consecutive poor harvests. Similarly, compared to the five-year averages for September (2016-2020), local cereal prices in September 2021 were higher (10-54%) in most regions due to reduced supply this year. Specifically, white maize prices increased in Banadir (17%), Juba (41%) and Shabelle (40%); red sorghum prices increased in central (15%), northeast (47%) and Sorghum Belt (54%); while white sorghum prices increased in northwest (14%) and Hiran (41%).

**Prices of imported food** items (rice, sugar, vegetable oil, wheat flour) exhibited mild ( $\leq \pm 10\%$ ) changes (mostly increases) in September 2021 compared to a month ago across most regions of Somalia. Compared to the five-year average, prices of most food imports were higher in most regions of Somalia mainly: southern regions (6-26% for rice, 3-25% for sugar, 48-67% for vegetable oil and 17-29% for wheat flour); central regions (23% for rice, 19% for sugar, 38% for vegetable oil and 28% for wheat flour); and northwest (20% for rice, 0% for sugar, 15% for vegetable oil and 7% for wheat flour). These price increases are mainly due to rising food prices on the international market this year. However, price of imported items were significantly higher compared to the five-year averages in northeast markets (52% for rice, 34% for sugar, 90% for vegetable oil and 53% for wheat flour). This is mainly due to depreciation of the local SOS currency as well as rising food prices on the international market this year.

**Livestock (local quality goat and camel) prices** mostly increased at mild rate ( $\leq \pm 10\%$ ) in September 2021 compared to August 2021. However, compared to the five-year average, livestock prices are still higher in most regions of Somalia: south (8-23%), central (6-21%) and northwest (6-9%). Price increases were even higher in northeast regions (47-49%) due to the loss of purchasing value of the local currency this year.

Milk prices (camel and cattle) mostly increased at mild rates ( $\leq \pm 10\%$ ) in September 2021 compared to a month ago in most regions of the country due to reduced milk availability due to drought conditions that prevailed in most regions. Compared to the five-year average for September (2016-2020), cattle milk prices mostly exhibited mild to moderate increases in south (4-21%) and central (9%) regions but mildly lower in northwest (3%) and northeast (11%) regions. On the other hand, camel milk prices exhibited mild increases across most regions ( $\leq \pm 5\%$ ) in September. Compared the five-year average for September (2016-2020), camel milk prices mostly exhibited increases in south (5-21%) and northeast (8%) but decreased in northwest (3%) and central (17).

**Labour (unskilled) wages** remained relatively stable or changed at mild rates ( $\leq \pm$  9%; mostly increases) in most regions across the country in September 2021 compared to a month ago. Compared to the five-year average, labor wages are higher (3-55%) in most regions in September 2021. However, labour wage rates were stable in Juba and slightly lower (2%) in the northwest in September 2021 compared to the five-year averages.

**Terms of Trade (ToT)** between daily labour wage and cereals either remained stable or changed by  $\pm 1$ kg across all regions in September 2021 compared to a month ago. Compared to the five-year average for September (2016-2020), ToT between daily labor and cereals mostly declined (1-4kgs) in most regions attributable to higher cereal prices this year. However, ToT was slightly higher in central and northeast (+ 1kg) compared to the five-year averages.

ToT between local quality goat and cereal prices exhibited a mixed trend in September 2021 across the country. TOT was stable in Sorghum Belt, decreased in Juba (1%), Banadir (3%) and northeast (5%) but increased in central (5%) and northwest (7%). On the other hand, compared to the five-year average for September (2016-2020), the ToT between local quality goat and cereals was lower (1-28%) in most regions of the country attributable to higher cereal prices this year.
