

The two main rainfall seasons for Somalia are Gu (April-June) and Deyr (October-December). The time series maps show the changes in rainfall performance month-on-month compared to the monthly Short-Term Average (STA) for Jan 2004 to Nov 2023. The multiple orange/red markings indicate rainfall deficits when compared to STA while the purple/bluish areas indicate rainfall improvements. Areas in predominantly white color indicate that there is relatively no much change in rainfall amounts compared to the short-term average.
