

The two main rainfall seasons for Somalia are Gu (April-June) and Deyr (October-December). The time series maps show the changes in rainfall performance month-on-month compared to the monthly Long-Term Mean (LTM) for Jan 2002 to Sep 2021. The multiple orange/red markings indicate rainfall deficits when compared to LTM while the purple/bluish areas indicate rainfall improvements. Areas in predominantly white color indicate that there is relatively no much change in rainfall amounts compared to the long-term mean.
